THIS most count invention can now be seen at Lownes, Oracil a Co.'s. No 1s Front Row, Mamphis, Tenn; its wenderfully simple adeptation to the purpose required is apparent of a charm; the security affected by it is also as apparent; the facility of saling it more complete than any other THE save in me.

Read the 's lowers from the Mentermery (A.s.) Mail: Invariantly, 'S Oor Lock. — We have seen a take of cotten tied with heep inno fasteness with this new dowice. It seems to adcomplete me out proposed with the examples of cheapmans and simplicity. The 'theke' committee of two small castings, about 1% timbes long and out we had not content to the matter. The under one has an opening at reach end amiliantly with the white admitter and end of the hop. The riper one, or but, only it shads thick, trivind stantister in the matter. The under one has an opening at reach end entirely with the white fact and of the hop.

The manner of applying it every timple. Any common hosp from of proper which and of the hosp of may require length to out the hale, it takes in the hand, one end passed through the openine from the under out, of one passed through the openine from the under out, of one may then have the lack in the sent of about and may then bent over the wild of the lock. The allows through a loop or opening in the sponsite end of the hop is their passed town them as the other. The hattan in them turned hash, and the how may be moved if desired. To prevent the halts, past plans over them and the how there is the recover the matter and on the house of the lock. The new of the house and the hour them and the hour is the hour of the house of
